

Promoting good health & wellbeing for all

VALUE HEALTH AFRICA ACTIVITY/MISSION REPORT

VAHA MONTHLY REPORT MARCH

SUBMITTED BY: Mbianke Livancliff

DATE:

MONTH: March

MISSION TEAM: Mbianke Livancliff, Ongla Diane Pascaline

ACTIVITY TITLE: Cholera response SW

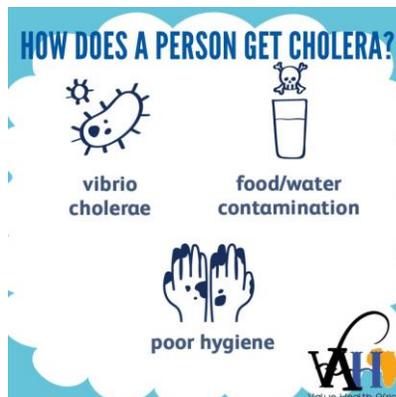

Report Control by: Diane and Mercy

OBJECTIVES OF EACH ACTIVITY:

- 1- **Objectives I**
Build capacity of vulnerable health facilities in the response to the cholera epidemic
- 2- **Objectives II**
Protect frontline health workers in the cholera response
- 3- **Objectives III**
Reduce mortality and morbidity due to Cholera

BACKGROUND:

Since February 2022, the SW region of Cameroon have been raged by a new wave of cholera epidemic. With the first case identified in Ekondo Titi Health district, it rapidly spread to Limbe, Buea, Tiko, Kumba and Mundemba. The daily increase of cases led to the shortage of material and human resources to effectively respond to the epidemic as hospitals became overwhelmed and out-staffed. Vulnerable health facilities like mile 16 integrated health center with limited resources where seen crawling on their needs and in need of an urgent intervention.

Promoting good health & wellbeing for all

KEY ACTIVITIES CONDUCTED

1- Activity 1

Infection prevention and control education in Cholera education of 12 health workers of MUNDEMBA Health facility

2- Activity 2

Material donation including PPEs, blood pressure machines, disinfection equipment's(spraying can, chlorine etc)

BREF DESCRIPTION OF EACH ACTIVITY

1- Activity 1

12 Workers at the health center were schooled on IPC policies, IPC committee and IPC including hand washing, patient bed change in a cholera ward, cleaning a cholera ward, disinfecting a cholera Unit, monitoring and evaluation of IPC procedures

2- Activity 2

After the training, the health center was giving materials to effectively attend to cholera patients and for personal protection. Disinfection equipment and materials were given to the cleaning department

OUTCOME OF EACH ACTIVITY

1- Activity 1

No mortality due to Cholera in the center after the project

2- Activity 2

No staff became infected with Cholera

Promoting good health & wellbeing for all

KEY PERSONS MET:

Organisation	Name	Contact
COC mile 16 Health center	Mme Etchu	677645184

MATERIAL DONATED:

Designation	Quantities
PPE	10 paires
Blood Pressure Machine	01
Stethoscope	01
Face Mask	3 Pack
Bucket	10
Spray CAN	01
Gloves	02 packs
Chlorine	100g
javel	10 liters

CONCLUSIONS/RECOMMENDATIONS:

Conclusion

IPC trainings during infectious diseases response is of uttermost importance in protecting front line health care workers and limit the spread of infectious diseases.

Recommendations

Many more trainings should be carried out in vulnerable health facilities as an epidemic preparedness

BUDGET / Expenses LINE

Item	Quantity	Unit price	Total price
